Energy storage regulations turkey

The Turkish government has published long-awaited rules for energy storage in its official journal. Local solar association Günder said the first projects will be approved in the middle of 2023...

The approach taken by Turkey's government and regulatory authorities to adapt energy market rules will create "exciting" opportunities for energy storage and renewables. According to Can Tokcan, a managing partner at Inovat, a Turkey-headquartered energy storage EPC and solutions manufacturer, new legislation is expected to be adopted ...

Simplifying the procedure for adding photovoltaic and wind power capacity to storage facilities has turned the energy sector around, according to Turkey''s chief regulator. Chairman of Turkey''s Energy Market Regulatory Authority (EMRA or EPDK) Mustafa Y?lmaz claimed it will essentially enable renewable electricity plants to produce baseload ...

Turkey's government has introduced secondary legislation establishing the procedures and principles to install storage energy systems.

On November 19, 2022, several amendments (the Amendments) were made to the Electricity Market License Regulation (the Regulation) to complement the existing rules with respect to the development and operation of electricity storage units within the boundaries of generation plants.

Turkey"s government has introduced secondary legislation establishing the ...

Turkey"s Energy Market Regulatory Authority (EMRA) has granted the f irst ...

The new provisions are aimed at implementing the primary legislation introduced in February 2020. The Turkish storage market may reach a size of 1 GWh per year within the next two years.

The new provisions, which have been in force since May 9, when they were published in the country's official journal, are aimed at implementing the primary legislation for the grid connection of energy storage systems that was issued by the Turkish authorities in February 2020.

"According to the regulation, a separate storage facility can be established adjacent to the production facility and consumption facility," Eren Engur, a board member of the energy storage committee at the Turkish PV association, G?nder, told pv magazine. "Distribution companies will be able to establish a storage facility by proving that it is cost-effective."

Furthermore, Engur explained that storage systems deployed by distribution companies may not be used for power trading, only for grid balancing. "Storage systems can be installed by requiring approval [from] the energy regulator, EMRA … and more than [one] system can be deployed under a supply license," he added.
