

Epl 300bt 12v g2

Epl 300bt 12v g2

Available in 12v 100Ah (Slim), 125Ah, 200Ah and 300Ah capacities and 24v 100Ah & 36v 100Ah, the ePOWER B-TEC lithium battery is designed and intended for use in deep cycle applications where a single battery is required that meets the amp-hour capacity.

The G2 now incorporates a "Built-In Reset Button" making re-starting a flat battery a breeze. No longer do you need to apply a voltage to the battery terminals to wake up the battery. Press the button and within seconds, the battery will come back to life ready to accept a charge source to rejuvenate the battery.

The Enerdrive Enerdrive B-TEC G2 battery incorporates wireless Battery Monitoring Technology. By downloading the Android(TM) or Apple(R) app to your smartphone or tablet device, you can monitor the following information;

The Enerdrive ePOWER B-TEC battery incorporates wireless Battery Monitoring Technology. By downloading the Android(TM) or Apple(R) app to your smartphone or tablet device, you can monitor the following information;

The battery is also equipped with an internal Battery Management System that can monitor and optimise each Prismatic cell within the battery during normal operation. It will protect the battery pack from overcharge, over discharge, over temperature & short circuit. The BMS helps to ensure safe and accurate operation of the battery.

Lithium v AGM Capacities

The ePOWER B-TEC battery provides 60% more usable power than its equivalent lead acid cousin and being nearly 50% lighter and 30% smaller makes for a superior alternative. The ePOWER B-TEC battery is perfect for camper trailers, 4WD's (AUX battery), caravans, small water craft, low power communication sites or any other application that requires the use of a single deep cycle battery that meets the amp hour capacity.

With over 7 years of researching, designing and testing lithium batteries and the associated charging systems, Enerdrive are at the forefront of lithium battery systems in Australia. Enerdrive is the only Australian company that can supply a fully integrated self-branded energy system to suit your setup. With over 3000 complete systems in operation Australia wide, Enerdrive is regarded as the leader in the field of lithium batteries and energy systems for Mobile, Marine and Remote applications.

Please Note; The ePOWER B-TEC battery is capable to be paralleled to a second ePOWER B-TEC battery of the same size. For maximum performance and lifespan of your ePOWER B-TEC battery, no more than 2 batteries should be connected together to increase your overall capacity. Overall loads when paralleled should

Epl 300bt 12v g2

not exceed the current limits of a single battery BMS.

If you are requiring a battery system larger than ePOWER B-TEC battery, please look at the Enerdrive Pro Series Power Pack Systems which can offer multiple parallel and series connections with Active Cell Balancing Protection across the entire pack.

Enerdrive Pty Ltd has been providing independent power systems to the Australian market since 1996. Starting as Advance Trident Limited in 2003 and predominantly servicing the marine industry, ATL saw the huge growth potential in the mobile and recreational vehicle market soon after, and in 2008 ATL Limited morphed into Enerdrive. In recent times Enerdrive has embarked on its own manufacturing program. They saw the need to control their own destiny and produce high-end products that the Australian marketplace was demanding. This program has led to Enerdrive manufacturing their own range of ePOWER AC Battery Chargers & DC2DC Battery Chargers along with Lithium battery systems.
