Ceiling of Subsidy - The EV-charging at Home Subsidy Scheme

Applicants should study carefully the "EV-charging at Home Subsidy Scheme - ...

The EVCEI must be designed by a consultant according to EPD's "Design Guidelines for Electric Vehicle Charging-enabling Infrastructure under the EHSS".

The subsidy will not cover the supply and installation of EV chargers / EV supply equipment to be connected to the EVCEI installed under the EHSS, and any operating, maintenance and insurance costs of the installed EVCEI and the fire detection system if installed. No subsidy will be provided for any EVCEI or charging facilities installed before submission of the application to the EPD.

The HKSAR Government announced on 23 February 2022 that an additional sum of HK\$1.5 billion into the EV-charging at Home Subsidy Scheme, that is, a total of \$3.5 billion to be made available to extend the plan for four years to the financial year 2027-28, assisting the installation of electric vehicle charging infrastructure in about 700 existing private residential buildings and about 140,000 parking spaces in Hong Kong. We await details from relevant official sources.
