Federal tax credits for renewable energy

An official website of the United States Government

If you make qualified energy-efficient improvements to your home after Jan. 1, 2023, you may qualify for a tax credit up to \$3,200. You can claim the credit for improvements made through 2032.

For improvements installed in 2022 or earlier: Use previous versions of Form 5695.

Beginning Jan. 1, 2023, the credit equals 30% of certain qualified expenses, including:

The credit has no lifetime dollar limit. You can claim the maximum annual credit every year that you make eligible improvements or install energy efficient property until 2033. However, beginning in 2025, for each item of qualifying property placed in service, no credit will be allowed unless the item was produced by a qualified manufacturer and the taxpayer reports the PIN for the item on their tax return.

The credit is nonrefundable, so you can't get back more on the credit than you owe in taxes. You can't apply any excess credit to future tax years.

You may claim the energy efficient home improvement credit for improvements to your main home. Your main home is generally where you live most of the time.

For the energy efficiency home improvement credit, the home must be:

In most cases, the home must be your primary residence (where you live the majority of the year). You can't claim the credit if you're a landlord or other property owner who doesn't live in the home.

If you use a property solely for business purposes, you can't claim the credit.

If you use your home partly for business, the credit for eligible clean energy expenses is as follows:
