Range Overview Specification Sheet. The following specifications pertain to the ...

Important: It is very important to read this documentation in full and carefully. Freedom Won battery warranties require that you have configured the battery correctly.

Please take special and careful note of the section below on "DC bus pre-charging".

Freedom Won () produces two ranges of LiFePO₄ batteries for 12V, 24V and 48V systems:

conveniently and cost effectively over time. The eTower is designed primarily for systems that need to start with 5kWh initially with a view to growing the storage capacity over time in 5kWh increments up to 20kWh. The LiTE range is recommended for systems starting at 10kWh or larger than 20kWh.

This documentation makes use of values for 48V systems but values for 12V and 24V systems can be derived from below:

Note: Refer to Freedom Won website for detailed specification sheets covering all models
