

## Germany solar energy storage

Held alongside the Battery Show Expo Europe in Stuttgart, Energy Storage Germany spotlights Germany's rapid ascent in the European storage sector. Once driven by residential demand, utility-scale projects are now surging, with 184 MW added across 44 projects in 2023. With nearly 16 GWh of capacity installed in the first half of 2024, Germany is set to integrate 24 GW of utility-scale energy storage by 2037, creating substantial opportunities

The Summit will explore the current regulatory landscape in Germany, incentives from the proposed 2028 capacity market, trading best-practice, understanding merchant revenue opportunities, project development challenges and will even explore Germany's unique opportunities in decentralized flexible assets. Meet Germany's leading developers and IPPs, investors, policymakers, TSOs, manufacturers, optimisers, traders and consultants, who are all paving the way for energy storage deployment in the country.

Born from the Energy Storage Summit series, with a portfolio of ten events dedicated solely to energy storage deployment, this is an event where we can guarantee meetings with key stakeholders in the German energy storage sector.

Sweden-based BESS developer Ingrid Capacity will trade its BESS projects as they start to come online, CEO Axel Holmberg said, while also discussing the CEE market and fellow Swede Northvolt's current challenges.

Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU.

A roundup of news from Europe, with Alfen and Sermatec deploying BESS projects in Sweden and Bulgaria and new firm terralyr raising €77 million for project development and operation, starting in Germany.

IPP and energy trader Monsson has kicked off the environmental permit process for a 2GWh BESS project in Romania, which an executive said will use its own patented energy storage solution.

Current+Current? is the leading source of news, insight and opinion as the energy transition accelerates. Current? engages with its readers on a daily basis. News stories, insightful blogs, in-depth analysis and carefully selected guest content are uploaded each day, and our Daily Snapshot emails inform more than 14,700 industry professionals every morning. Since its launch in May 2018, traffic has more than trebled as Current? has found its footing within the energy transition, and we have sizeable plans for its growth moving

Energy-Storage.newsEnergy-Storage.news offers a full news service along with in-depth analysis on important topics and industry developments, covering notable projects, business models, policies and regulations, technical innovations and more. The website, from the makers of PV Tech, is an essential tool for anyone within the energy storage value chain.Energy-Storage.news

The first of its kind, this study offers an overview of the photovoltaics and battery storage market in Germany. It provides the latest statistics on the PV market and battery storage systems, along with an examination of current funding mechanisms in Germany. From market outlook to anticipated growth in the PV market and the evolving role of battery systems, this study outlines both present state and future prospects. Commissioned by the German Solar Association (BSW-Solar), supported by Intersolar Europe 2024 and conducted by the Fraunhofer Institute for Solar Energy Systems, it represents a significant contribution to understanding the dynamics of Germany's renewable energy landscape.

Furthermore, market trends point to continuing robust growth across all market segments, from residential systems to industrial applications and ground-mounted solar parks, driven by increasing demand for affordable, green electricity, the population's desire for greater energy independence, robust remuneration schemes, regulatory support for PV and battery storage systems, as well as substantial market opportunities for investors and installers. By 2030, further trends are expected to accelerate as Germany ramps up its efforts to meet its ambitious climate targets.
