

Goplus solar dome pool heater

Goplus solar dome pool heater

Energy Efficient Solar Panel? With no electricity or gas connection needed, ...

Delivery to USA & Canada

If you are tired of a cold swimming pool, then this solar heater is for you. our solar swimming pool heater is designed to heat pool in a green and saving energy way, Add weeks to your swimming season & swim in a warmer pool during the season. Solar energy is magnified like the greenhouse effect through the clear lens of the heater and captured by black coiled hoses that carry pool water. The solar-heated pool water is circulated back to your pool by your own pump & filter system. Do not hesitate to buy one!

Goplus is a professional manufacturer of Sports Goods, Tools, Home Decors and Industry Goods.

Enjoy family swimming time anywhere and anytime!This solar pool heater panel can be mounted on the roof or rack or simply laid on the ground beside your pool. By connecting the existing water pump, The pool water is fed into the solar heater tubes where it is warmed by the sun and then returned to the pool. Without electricity or gas, it allows you to capture free heat from the sun's rays to effectively raise your pool water temperature by 10.8°. It's an efficient and cost-effective method to heat your pool!Note: Before purchasing, please confirm the number of heating collectors required according to the size of the pool.The water pump power rate is not less than 0.75HP and pressure does not exceed 1.5bal(21 PSI), Which is not included
