The 48V ETHOS & PowerPro have arrived! These LiFePO4 systems are here to revolutionize power storage for every family home & business in America! These systems can be customized for tiny homes, large estates, or light commercial systems. Our easily-installed ETHOS & PowerPro Systems are built to provide unmatched reliability & longevity in your home or office. With configurations from 10kWh up to 92kWh, you can easily find the ideal system to cover your energy needs, stay prepared in case of emergencies, or capitalize on net metering programs, peak rate offsetting, & other tax incentives.

The next generation of residential ESS is here! The 48V LiFePO4 ETHOS is a UL-certified, CEC-listed solution designed to provide reliable power storage for every home in America. Boasting a stackable, modular design, with all cables and components included, the ETHOS is easily installed to your wall & affords the ability to expand upon your system later on. We pair the ETHOS with a cutting-edge, UL1741-certified LUXPower inverter capable of supporting 18kW PV arrays, but the ETHOS is compatible with dozens of 48V inverters in case you already have one setup at home. Be sure to check in with your local AHJ to confirm your desired system is compliant with all state and regional regulations.

With preconfigured systems for indoor & outdoor installations, you can shop confidently knowing that BigBattery has a power system to support your energy needs. Plus, for solar installers, flexible system configurations & special installer financing options make the ETHOS the ideal battery solution for your installs. Check out our all-new 48V ETHOS Systems below!

Equip your home or cabin with an indoor power system and take back control of your power! Say goodbye to rolling blackouts & grid instability and say hello to safe, reliable power, lower electric bills, & energy independence. Shop UL-certified, indoor system configurations ranging from 10 – 30kWh right here, and be sure to consult your local AHJ to confirm your new system is compliant with all state & regional regulations.

If you're looking to ensure that your home is always powered & prepared, our outdoor residential systems are your solution. Equipped with an IP65-rated casing, heavy-duty cabling, an advanced BMS, & paired with state-of-the-art inverters, these systems provide ultimate peace of mind through every season. Save on utilities, capitalize on net-metering programs, & take your home's power to the next level. Shop UL-certified, outdoor system configurations ranging from 10 – 70kWh today, and be sure to consult your local AHJ to confirm your new system is compliant with all state & regional regulations.

From the office building to the jobsite, businesses are taking control of their power now more than ever, and these commercial power systems are the next step towards a lower carbon footprint for your business. We offer preset, UL-certified configurations up to 92kWh, but for those looking to truly transform how they power their business, get in touch with us today to get a quote for a custom-built, off-grid system of up to
