Official websites use .gov A .gov website belongs to an official government organization in the United States.

Secure .gov websites use HTTPS A lock (Lock Locked padlock) or https:// means you've safely connected to the .gov website. Share sensitive information only on official, secure websites.

The U.S. Department of Energy's Office of Electricity accelerates innovation and creates "next generation" technologies to modernize the electrical grid. With grid modernization and the clean energy transition continually progressing, we've developed resources, including podcasts, to keep you informed. Get advice, insights, and lessons learned from innovators of emerging technology and trends.

Keep up with the Office of Electricity's work taking our electricity grid and energy storage into the future.

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.
