In 3rd world, with rising electricity costs and growing economic concerns, Solar power is becoming an increasingly attractive option for homeowners in Pakistan. The Inverex Nitrox 12kW Hybrid Solar Inverter is a powerful and versatile solution that allows you to achieve energy independence amid chaos.

The Nitrox 12kW Inverter boasts a 12kW AC output, capable of powering multiple appliances simultaneously. It also handles a maximum DC input of 15.6kW, allowing you to connect a larger solar panel array for increased power generation. This translates to significant savings on your electricity bills and a reduced reliance on the grid.

Traditional inverters use a single MPPT (Maximum Power Point Tracking) tracker, which can limit efficiency if your roof has shaded areas. The Nitrox 12kW inverter features innovative dual MPPT trackers (or even 2+1 configuration) that can independently optimize power output from different sections of your solar array. This ensures you get the most out of your solar panels, even in less than ideal conditions.

The Nitrox 12kW Inverter offers the flexibility to choose between Lead-Acid or Lithium-ion batteries. Depending on your budget and performance needs. With a wide battery voltage range of 40-60V and a high 240A charge/discharge current. The inverter ensures efficient battery management. This allows you to store excess solar energy during the day and use it to power your home at night or during outages.

Built to withstand Pakistan's harsh weather conditions, the Nitrox 12kw 3-phase inverter features a robust IP65 weatherproof rating. Additionally, the inverter provides remote monitoring capabilities through the SOLARMAN app. Allowing you to track your system's performance and energy production from anywhere.

The Inverex Nitrox 12kW Hybrid Solar Inverter is a perfect solution for homeowners in Pakistan looking to take control of their energy needs and embrace a sustainable future.

Inverex nitrox hybrid price

Experience energy freedom and constant power supply with efficient energy management through the Inverex Nitrox 12kW Hybrid, setting new standards in 12kW on grid solar system in Pakistan. Offering exceptional value, Inverex Nitrox 12kW 3-phase hybrid inverter price in Pakistan makes it ideal choice for users looking for the best 12kW Inverter for their 12kW off grid solar system for home in Pakistan.
