Ion solar panel company

The best of EcoWatch right in your inbox. Sign up for our email newsletter!

We work with a panel of solar experts to create unbiased reviews that empower you to make the right choice for your home. No other solar site has covered renewables as long as EcoWatch, which means we have more data and insider information than other sites. Our rankings are never affected by revenue or partnerships.

In 2017, two Utah solar companies, Vision Solar of Provo and Zing Solar of Draper, merged. The new company was named ION Solar, and it has become one of the fastest-growing and arguably one of the best solar companies in the U.S.

Ion Solar has installed thousands of systems in eight states. This review will cover the company's offerings, pricing, customer reviews, and more.

Within just a few years of its founding, ION Solar has installed a whopping 100-plus megawatts (MW) of solar systems. Thanks to its explosive growth, it has been featured in The New York Times and The Wall Street Journal. Plus, with an A+ Better Business Bureau (BBB) rating and largely positive customer reviews, we can say that ION Solar is a good solar company to choose..

Resulting from the merger of two solar companies, ION Solar is a full-service provider of solar systems, with in-house designers, surveyors and installation technicians.

ION Solar has been featured on several lists of fastest-growing companies, including ranking 24th on the Inc. 5000 in 2017. It claims to be the fourth largest residential solar installer in the country.

Through its ION Earth program, it is also involved in community service work, donating a solar system for a home, business, school, or shelter in need for every two MW of panels it installs.

ION Solar primarily offers residential solar power systems but also installs commercial solar solutions. The company also provides energy efficiency upgrades and electrical work. According to ION Solar, a typical solar installation process takes 60 to 90 days from start to finish. Below is an overview of the steps involved in going solar with ION Solar.

A chat with an ION representative helps you discover if solar is right for your home. The salesperson will answer any questions you have and lay out the solar options available to you. ION Solar stresses that its support staff will be with you every step of the way.

If you choose to proceed with a solar system with ION, its engineering team will design a system customized

Ion solar panel company

to your home and specific energy needs. It incorporates premium components into your system design.

ION Solar will walk you through your system design to ensure you're satisfied with it. The rep will go over the equipment to be installed, and with your approval ION's permitting team will work with your jurisdiction to secure necessary permits. ION will also help apply for available incentives and rebates in this step.
