## Ivy charging station locations

You can find available level 3 fast-charging and level 2 destination charging ...

You can find available level 3 fast-charging and level 2 destination charging locations on the Ivy app for iOS and Android. Download the app now. You can also find us on PlugShare and Chargehub, and shortly in your EV's dashboard.

Ivy's level 3 fast-charging locations are carefully selected to provide coverage across the province, giving EV drivers the confidence to explore all that Ontario has to offer, and with the goal of providing the best customer experience. Each of our level 3 locations offer convenient access around the clock and amenities, such as washrooms, refreshments and food to enhance our customers' experience.

We're here to support you every step of the way. For any resources, information, or answers to your questions, start with our Support page. If you need immediate support for public charging, you can reach us 24/7 at 1.800.301.1950.

Be the first to hear about Ivy tips, promotions, and network updates.

OPG respectfully acknowledges that the lands on which its generating stations and other assets are located are within the traditional and treaty territory of many Indigenous communities. [Click to read more.](#)

Central Ontario is home to 20 of our hydroelectric facilities, some of which, like our Sills Island Generating Station, have been part of their community for more than one hundred years.

Eastern Ontario is host to one gas-fired generating station and 15 of our hydroelectric generating stations on the St. Lawrence, Ottawa and Madawaska Rivers.

Northeastern Ontario contains 14 of our hydroelectric stations, including several we built or redeveloped through key partnerships with local Indigenous communities.

Northwestern Ontario hosts 11 of our hydroelectric stations as well as a former coal generating station that we converted to use biomass as fuel.
