

Kent solar panel auctions

Home Features Homes Gardens and Interiors Article

Are you considering installing solar panels but unsure where to start? The latest edition of the "Solar Together" scheme is now open for registrations in Kent.

This scheme offers residents the opportunity to access high-quality solar panels and battery storage at competitive prices.

Making installations more affordableSupported by councils and authorities in the region, the Solar Together scheme aims to make solar systems more affordable for homeowners. By bringing residents together to make a group, the scheme enables participants to save 10-25% on their solar PV installation costs while receiving support and guidance from a team of solar experts.

Residents eligible to participate in new schemeTo participate, you need to own the property or have permission from the property owner to install a solar system on the roof. Small and medium-sized businesses and Commonhold Associations that meet these requirements can also participate.

Hassle-free process and added benefitsThe registration process is hassle-free, making it an excellent choice for anyone looking to switch to solar while saving money.

Here's how it works:1. Register: Show your interest for free at [solartogether .uk](https://solartogether.uk) before 18 October 2024.2. Auction: Solar Together hosts an auction where trusted installers compete to give their best price.3. Personal Recommendation: Get a system recommendation based on your home and energy requirements.4. Make a Choice: You can decide whether you want to move forward with the installation.

By registering, you will also learn how much you could save on your energy bills with solar panels and battery storage and how much you could earn by exporting excess energy.

In addition to these benefits, you can choose to install optional battery storage or electric vehicle charge points.

Impact and endorsementsThe initiative has already created a significant impact in the region by successfully installing 33,934 solar panels. The scheme is anticipated to prevent 2998 tonnes of carbon emissions over the next 25 years.

The Solar Together initiative has received endorsements from community leaders and local authorities across Ashford, Canterbury, Dartford, Dover, Folkestone and Hythe, Gravesham, Maidstone, Medway, Sevenoaks,

Swale, Thanet, Tonbridge and Malling, and Tunbridge Wells.

Tangible benefits and savings for participants People who have participated in the scheme say that it has brought them tangible benefits. Jayne from Folkestone is "very happy with the easy and efficient process of installing 12 solar panels", which has helped her save money. This installation will allow her to save ?811 each year. Additionally, an export tariff will provide her with an extra income of ?191 per year.
