Introducing our 3.2V 3000mAh LiFePO4 Battery Pack, specifically designed for Gama Sonic Solar Lights. This battery pack is a reliable and efficient power source for your outdoor lighting needs.

With a nominal voltage of 3.2V and a capacity of 3000mAh, this battery pack provides ample power to keep your Gama Sonic Solar Lights functioning optimally. It consists of two 18650 batteries, which are known for their high energy density and long cycle life.

The Lithium Phosphate (LiFePO4) chemistry offers exceptional performance and durability. This battery pack is designed to fit GS-97, GS-103, and GS-104 series lamps, as well as the current-generation GS-94 lamps (please note that older GS-94 series lamps use NiMH battery packs). The included male adapter allows for easy replacement in the lights, ensuring a hassle-free installation process.

One of the key advantages of LiFePO4 batteries is their extended lifespan. With proper care, these batteries can last up to 3 years, providing long-term reliability and cost-effectiveness. They are also lightweight and have a high energy density, making them an ideal choice for portable solar lighting applications.

Safety is a top priority, and this battery pack is equipped with an installed IC chip that prevents overcharging and over-discharging. This helps protect the integrity of the battery chemistry and extends the overall lifespan of the battery pack. Additionally, LiFePO4 batteries are known for their high temperature and storage performance, ensuring optimal operation even in challenging outdoor conditions.

Our 3.2V 3000mAh LiFePO4 Battery Pack offers the highest safety standards among all Lithium batteries. You can rely on its performance and longevity, providing you with consistent power for your Gama Sonic Solar Lights.

Experience the benefits of LiFePO4 technology in your outdoor lighting system with our reliable and efficient battery pack. Illuminate your outdoor space with confidence and make the most of your Gama Sonic Solar Lights.
