

Lifepo4 battery charger reviews

Lifepo4 battery charger reviews

A majority of the new gadgets that are rechargeable use lithium batteries, because they are lighter, last longer, and can be recharged quickly.

Many, including Jesse and me, are making the switch from lead-acid batteries to lithium in our RV. They're also popular upgrades to boats, solar banks, golf carts, even motorcycles.

Of course, not everything has gone fully lithium, 12 volt starting batteries in vehicles are still mostly lead-acid, but most deep cycle battery applications can benefit from a lead-acid to lithium switch.

This article is going to be about battery chargers specifically for lithium batteries. If you haven't bought a battery yet, you can check my post on the best lithium batteries for RV use.

First, it's important to know that there are different types of lithium batteries.

I am going to focus on battery chargers for the LiFePO₄ type. Note that many of these can also be used to charge other types of batteries like AGM, GEL and flooded-lead acid.

Summary (links to Amazon)

Victron Energy specializes in all things battery, they make reliable batteries, chargers, converters, and more.

The NOCO Genius 1 is a very smart and versatile trickle charger. It can charge all the common types of batteries, including 6 volt and Lithium.

It's going to charge them very slowly, but it will do it correctly and safely, which is a must-have when looking at any type of lithium compatible battery charger.

Since it's so small there have been reports of it getting warm when charging large 12 volt lithium batteries.
