

LiTime lifepo4 100ah review

LiTime lifepo4 100ah review

In partnership with LiTime

As someone who has extensively used and tested various deep cycle batteries, I can confidently say that the LiTime 12V 100Ah TM LiFePO4 Battery is a reliable and high-quality option for those in need of a powerful battery.

One of the standout features of this battery is its impressive capacity of 100Ah, which provides ample power for a variety of applications, including trolling motors, RVs, solar systems, and home energy storage.

The battery boasts a long cycle life of over 4000 cycles, making it a cost-effective and durable option for those who require a reliable power source.

Another notable feature of the LiTime 12V 100Ah TM LiFePO4 Battery is its low-temperature charging cut-off protection. The battery will automatically stop charging if the internal cell temperature drops below freezing at 32°F/0°C, preventing any potential damage that could occur from charging under extremely cold conditions. This crucial safeguard helps maximize battery life and efficiency while ensuring safe operation even in freezing environments.

Additionally, the built-in battery management system (BMS) is equipped with moisture-proof, dust-proof, and salt-spray-resistant technology, making it a robust and reliable option for those who require a battery that can withstand harsh environments.

The LiTime 12V 100Ah TM LiFePO4 Battery is designed to provide reliable and consistent power for a wide range of applications. With a capacity of 100Ah and a voltage of 12V, this battery is capable of delivering a total energy of 1280Wh. This makes it an ideal choice for use in off-grid power systems, RVs, boats, and other applications that require a high-capacity battery.

The LiTime 12V 100Ah TM LiFePO4 Battery is equipped with high-quality lithium iron phosphate (LiFePO4) cells. These cells are known for their superior safety, durability, and long cycle life. Unlike other types of lithium-ion batteries, LiFePO4 batteries are less prone to thermal runaway and do not contain any toxic or hazardous materials. This makes them a safer and more environmentally friendly option.

The LiTime 12V 100Ah TM LiFePO4 Battery features a compact and lightweight design. It measures 13 x 6.8 x 8.4 inches (L x W x H) and weighs only 22 pounds. This makes it easy to install and transport, and it takes up less space than traditional lead-acid batteries.

The LiTime 12V 100Ah TM LiFePO4 Battery can be charged using a wide range of charging parameters. It

LiTime lifepo4 100ah review

can be charged using a standard 12V charger or a solar panel. The recommended charging parameters for this battery are a charging voltage of 14.6V and a charging current of 20A. The battery can be fully charged in 5-6 hours using these parameters.

When it comes to performance, the LiTime 12V 100Ah TM LiFePO4 Battery is a top contender in the market. Here are some of its key performance features:

One of the most impressive features of this battery is its long cycle life. According to LiTime, this battery can last for over 4,000 cycles at 100% depth of discharge (DOD). This is far superior to traditional lead-acid batteries, which typically only last for a few hundred cycles. With LiFePO4 chemistry, this battery is designed to provide long-term reliability.
