Founded in 2016, SEMOA have today an international footprint in 13 countries of Africa with the statement to bring something more to people's daily lives. SEMOA is a pioneering fintech company that is reshaping the financial landscape across Africa by specializing in two key areas: the digitalization of banking services and empowerment of mobile transactions.

As a software editor, SEMOA offers a suite of APIs platform and white-label SaaS tools designed to address financial inclusion challenges in Africa, where traditional banking systems often fall short.

As a transaction enabler, SEMOA ac...

Startup Name: Agritech TOGO Industry: Sustainable Agriculture, IoT Technology, Artificial Intelligence, Water Resource Management

Bethel Kebab is a company that produces and sells vegetable meat with the taste and texture of beef in the form of skewers, fresh meat ... to people with cardiovascular diseases, diabetics, the elderly, to vegetarians, vegans ... and to all those who want to eat healthy

AquaRoots is a social venture dedicated to revolutionizing sustainable agriculture through the implementation of aquaponics systems. We design, build, and operate these integrated systems that combine aquaculture (fish farming) with hydroponics (soilless plant cultivation). By leveraging the symbiotic relationship between fish and plants, we create a closed-loop ecosystem that maximizes resource efficiency, minimizes environmental impact, and produces high-quality, nutrient-rich food.

Our aquaponics systems not only provide a sustainable source of fresh produce and fish but also serve as a sc...

Relika is both a solution to the problem of lack of coins, customer loyalty, and valorization of surplus through small fundraisers.

Baobaby uses technology to enable the transformation of local resources into affordable, nutritious and sustainable formulas. Based on baobab and moringa two locally grown vegetables our formulas are naturally rich in essential nutrients and antioxidants. Our business model forms a circle starting in rural communities and looping back in these communities creating domestic value and providing benefits for babies and mothers. Powered by mobile and data technology, our model has four steps including: 1: Supporting female rural farmers. we buy organic crops from local female farmers at a fair ...
