Solar Together London is a group-buying programme that has enabled Londoners ...

Solar Together London is a group-buying programme that has enabled Londoners to install solar panels on their homes at an affordable price. This supports the Mayor's plans to make London a zero carbon city.

Solar Together London is delivered by iChoosr and through this programme households and small businesses across London have signed up through the programme to have high quality solar photovoltaic panels (PV) installed on their roofs to generate electricity.

As the programme has developed there has also been the opportunity to have battery storage installed - helping residents capture energy when it's being generated and use it later - as well as electric vehicle charging points.

With support from local authorities, the Solar Together London scheme has provided a group purchase for solar panels at a very competitive price.

Solar Together London is now completing its fifth phase, with over 3,000 homes having had solar panels successfully installed through the scheme to date.

Following the failure of one installation company, some Solar Together customers need help to secure a refund or have their installation completed. Further information is available on the Solar Together website.

Welcome to the Community Energy London Potential Map! The purpose of this map is to help community energy groups find promising development opportunities and for policy makers to visually explore the potential of community energy in London.

We are still in a testing phase and so please get in touch if you have any issues.

This map has been developed to help community energy groups find promising development opportunities and for policy makers to visually explore the potential of community energy in London.

Data from the London Solar Opportunity Map, London Heat Map and the London Building Stock Model have been matched to community building types and the data can be explored by administrative area (borough, constituency, ward) or for London as a whole.
