

Malabo grid stabilization

Comprehensive Africa Agriculture Development Programme (CAADP) is Africa's policy framework on agricultural transformation, wealth creation, food security and nutrition, economic growth, and prosperity for all. CAADP goal is an agriculture led development that eliminates hunger, reduces poverty and food insecurity, enabling expansion for exports and higher economic growth path based on sustainable development and natural resources preservation principles. The 2014 Malabo Declaration on Accelerated Agricultural Growth and Transformation for Shared Prosperity and Improved Livelihoods constitutes a recommitment to the CAADP principles and values through seven commitments - find here the CAADP Malabo Commitments.

The continent has achieved significant progress after 20 years of CAADP implementation, but immense challenges remain. Successive Biennial Review reports indicates that the continent is not yet on track to meet the Malabo 2025 target. With the Malabo declaration ending in 2025, African Union and its partners have embarked on a process to outline the next 10-year agricultural CAADP agenda for the continent. The Post Malabo CAADP Agenda development process has three work streams – Stakeholder consultations, Analysis, design and drafting, and Political mobilization – across the continent culminating in the declaration of a new agenda and commitments by the Heads of States and Governments (HOSG) in the first quarter of 2025.

Stakeholder consultations focuses on enhancing stakeholder awareness and understanding, capturing stakeholder inputs, and validating the post-Malabo agenda. It is also key for ownership, buy-in and commitment to the priorities, actions and targets.

The main stakeholder consultations methods and approaches include regional consultations, Consultation of specific CAADP constituencies, Technical Roundtables, and submission of Independent memoranda. Various CAADP stakeholder constituencies can participate and provide their input for the Post Malabo Agenda through the platforms, approaches and activities outlined below. Post Malabo Process coordination Team will develop technical guidelines and reporting outline for stakeholder consultations.

Analysis and data analytics work stream is being led/ coordinated by AKADEMIYA 2063. The analysis is conducted by 13 Technical Working Groups, based on clearly outlined TOR, work plan and deliverables. Members of TWGs are eminent experts of continental and global standing selected based on experience, expertise, and achievement in specific thematic areas. Recruitment of TWGs members is in the final stage. The exercise was coordinated by A2063 in consultation with oversight committee and final list approved by AU. In constituting various TWGs, AU sought balance representation between research/academia and practitioners and ensured that key constituencies are represented in relevant TWGs as appropriate. Each TWG will have a convener and a co-convener.

Stakeholder who wishes to participate, contribute and/or provide input to specific TWGs can do so through

A2063, Respective TWG conveners, Post Malabo Process Coordinator or Oversight committee.

In addition to the analysis conducted by TWGs (coordinated by A2063), Policy LINK will conduct targeted analysis on two thematic areas:

Drafting process will integrate input from stakeholder consultations and analysis work streams to develop the Post Malabo Agenda and Action Plan. AU will develop the TOR and establish a drafting committee of carefully selected experts, as soon as possible, to review the input from the two work streams and use it to draft the key elements of the Agenda and Action Plan.

AU and its partners will organize the drafting committee meetings/ workshops for this purpose.

Stakeholder validation of the Post Malabo Agenda will be held during the 2024 CAADP Partnership Platform and Maputo Annual Planning and Learning Event (MAPLE). The objective of the validation meeting in October 2024 will be to:

Stakeholder validation meeting will be open to all the strategic partners and key stakeholders in the African Agriculture space and with interested on CAADP and African food security agenda. The partners and stakeholder interested in participating in the stakeholder validation can reach out to AU and/or Post Malabo Process Coordinator for more details, or register to participate through the appropriate registration portal when its activated.
