

Micro inverter solar panels kits

Micro inverter solar panels kits

Everything you need to grow your business with solar

Shop our selection of DIY microinverter solar panel kits. Hire a local contractor or install your own solar panel kit for extra savings!

Microinverters provide several advantages over traditional inverters. They are safer, easier to install, provide better shade tolerance, and allow for an expandable system.

Request a quote

Like PV optimizers, microinverters attach to the back of each solar panel to optimize the system's output and allow for individual panel-level monitoring.

Unlike optimizers, microinverters do not need a centralized string inverter unit to tie the system together.

Instead, the inverting capabilities are handled by the microinverter unit itself. That means that each microinverter + panel pairing is like a mini self-contained solar power system. You no longer have to worry about sizing panel strings to match a string inverter's power limitations.

The result is that microinverter system design is much more flexible, modular, and expandable than string inverter systems:

While microinverters are more costly up front, they have a longer warranty period that makes them a better value over the life of the system. String inverters are typically warrantied for 5-15 years and often require replacement in the middle of your system's lifespan. In contrast, Enphase's IQ8 series microinverters are warrantied for 25 years to match the length of most solar panel warranties.

Fill out the form for a complimentary solar quote that includes a custom satellite layout, system design and a breakdown of total project cost and estimated savings.

Some permit applications may require one or more plan revisions and resubmissions. Please supply us with all information necessary to make these revisions. Permit must be applied for with the city within 30 days of delivery of the permit package and any resubmissions must be resubmitted within 14 days of receiving the revised plans.

Our guarantee does not apply to installations on unsafe structures, unpermitted structures, ground mounts, structural engineering, structures not constructed to local building codes and other atypical building designs.

Micro inverter solar panels kits

This guarantee only applies to our standard solar system kits, it does not apply to custom orders or solar systems not designed by our engineers.
