5 Best Batteries for Minn Kota Trolling Motor- Top Recommended

One of the most important parts of your fishing boat is its battery. While marine batteries generally tend to be expensive, there's no way around getting a new one when the need arises. And it's not something you want to skimp on unless you want to start having days when you'd end your fishing plans earlier than planned due to a dead trolling motor battery.

With the advent of AGM technology, trolling motor batteries are now better than ever, requiring little to no maintenance and yet delivering more capacity than what obtained with older batteries. In this post, we'd be looking at some of the best trolling motor batteries on the market.

When looking to buy a new trolling motor battery, your best bet is one that can serve you throughout your fishing day. While the market abounds with options that promise just that, making the right choice from the pack can be a huge challenge.

So, we scoured the market for marine deep cycle batteries and compared several options in terms of technology, performance, durability, brand reputation, buyer reviews, and price. And after cutting out the low performers, we were left with these top contenders.

Whether yours is a Minn Kota trolling motor or another brand, you won't go wrong with these batteries.

The first thing that comes to mind when you talk about Weize batteries is affordability and high performance. This is exactly what the LFP12100 deep cycle battery from this company stands for. Let's take a quick look at the features and why this battery is on our list.

Just as the name implies, the battery provides you with 100 amps per hour. This means that you have sufficient power for your trolling motor and all its electronics. The sealed lead-acid battery lacks a wire harness but comes with screws. It promises long service life, deep discharge recovery, high performance, and deep cycle.

The LFP12100 Weize battery is one of the most versatile batteries in its category. Apart from trolling motors, it works well for RVs, travel trailers, mobility scooter wheelchairs, and sump pumps. You can also use it for golf carts, garden and lawn tools, electric vehicles, UPS systems, emergency lighting, and lots more.

It is designed to supply lots of power even though it weighs just 60lbs. This battery comes with the AGM design. As a result, you are sure that the lead-acid electrolyte will not leak out or spill. This also implies that you won't have to spend so much time maintaining the battery. The AGM design makes the terminals resistant

to corrosion.

The major selling point of the LFP12100 battery is that it is very affordable. It costs about half of what other AGM batteries in the same class cost. It also delivers a lot of power over a long period. This battery seems to be the perfect fit for your power needs when you are on a budget.

Overall, if you need a battery for your trolling motor that is very affordable, then this battery makes the cut. Older people and those with special needs will particularly find this battery helpful. This is because it is very easy to install while providing sufficient backup power to deliver high performance.
