

Mobile electric vehicle charger

Mobile electric vehicle charger

There is an opinion that charging an electric car with direct current is detrimental to ...

The TRAVELMASTER portable electric vehicle charging station recognizes ...

The Voltstack Mobile EV Charger is a solution designed to meet the surging demand for mobile electric vehicle fast-charging solutions in a world constrained by grid capacity limitations. Say goodbye to expensive infrastructure upgrades and embrace the flexibility of off-grid charging. Our first-of-its-kind clean energy mobile electric vehicle charger is here to transform how you charge your EVs and more.

Simple, simultaneous charging

Charge multiple electric vehicles simultaneously, including e-bikes and other alternative transportation options--no installation required.

Embrace the freedom of off-grid charging. Charge your vehicles anywhere, anytime, without relying on traditional power infrastructure.

This caters to all your electric vehicle needs, from boost charging to temporary charging sites or deployable recharging on demand.

Connect your Voltstack to our proprietary software, NeuronOS(TM) and gain complete control. It's an intelligent charging solution that puts you in the driver's seat.

To recharge, use its AC inputs or tow the Voltstack Mobile EV Charger to an EV charging station.

Silent and emissions-free

This Mobile EV Charger provides a clean, quiet charging experience while reducing your carbon footprint.

Ready to accelerate towards a mobile, emission-free off-grid charging future?
