

## Myanmar battery recycling

A workshop with the title "Battery Waste Management and Recycling for Electric Vehicles and Sustainable Renewable Energy", was held at the Ministry of Industry on 11 March to systematically manage expired and damaged batteries when electric vehicles become more widely used.

Our battery recycling service is one of the first professional pick up service in Myanmar that ensures batteries get safely delivered to recycling facilities in Europe. Currently, we accept five types of batteries in durable boxes that can hold 5kg worth of batteries.

On August 7, 2024, the Myanmar Ministry of Natural Resources and Environmental Conservation promulgated "Notification No.70/2024 Concerning the Management of Waste Batteries and Other Waste of Electric Vehicles." This Notification provides for definition of electric vehicle (EV) battery waste and other EV-related waste, specifying requirements ...

Second Spark introduces high performance, affordable lithium-ion batteries into Myanmar's mini-grid market, by prototyping the technology and creating a value-chain for the assembly and manufacture of recycled battery stacks at the village level.

A workshop with the title "Battery Waste Management and Recycling for Electric Vehicles and Sustainable Renewable Energy", was held at the Ministry of Industry on 11 March to systematically manage expired and damaged batteries when electric vehicles become more widely used.

Chair of Work Committee for Setting Policies, Standards and Procedures for Development of EV and Related Industries Deputy Minister for Industry U Yin Maung Nyunt said that the five work committees are cooperating with each other in the relevant sectors, and the research and development work committee is cooperating with relevant departments and organizations in implementing the policies for battery production techniques and management of waste batteries in various electric vehicles.

The deputy minister pledged to cooperate with the Ministry of Natural Resources and Environmental Conservation in drafting the policy on Lithium battery waste management system.

Afterwards, the Managing Director of Proven Technology Industry Co Ltd widely discussed the Lithium Battery Waste Management System.

The Deputy Minister for Industry gave the conclusion speech.
