Design a PV system for your location within the Netherlands, view the simulated ...

The solar-powered e-bike charging station project contributes to sustainability by ...

Read more about how solar energy works. Yield Model Explanation. The backbone ...

The sun is an infinite source of energy for all life on earth. For several decades, we humans have been able to convert the light of this star into electricity and heat. In time, we can be independent of the use of fossil fuels. A smart approach is required to lead our pathway forward to a positive solar future. TNO is therefore innovating in order to make solar energy affordable and available to all.

If we want to generate green energy on a large scale, we'll have to be smart in using the scarce space available in the Netherlands. Within 10 years, we'll make it possible to use any surface to generate sustainable energy. Curious how?
