Nicosia residential energy storage

Discover how our residential solar solutions can help you reduce home electricity bills, protect against rising energy costs, and contribute to a sustainable future. EnergyIntel offers smart, innovative products designed to make managing your home energy easier and more eco-friendly.

At EnergyIntel, we're committed to providing solutions that not only save you money but also contribute to a sustainable future.

Play a part in saving our planet for future generations--we are championing solutions that change lives and the world.

Energy efficient home for savingsThe Group offers every household in Cyprus the possibility of saving on energy consumption by utilising solar energy. To date, hundreds of residential consumers have entrusted the Group with energy solutions of photovoltaic systems, electric vehicle chargers and cooling, heating and ventilation services, finding significant reductions in their family's financial budget.

Electric Vehicle Chargers

Air Conditioning - Heating - Ventilation

Technical Support Packages

Every household in Cyprus can now generate, store and use its own electricity. Through Net Metering Photovoltaic System you can produce and exploit your own electricity at home, with the help of an autonomous Photovoltaic system. If there is a surplus of kilowatt-hours, it is transferred to the next two months and the specific kilowatt-hours are deducted from the EAC account.

The Virtual Net Metering project allows residents with unsuitable roofs for PV installation to continue enjoying all the benefits of solar energy utilization, by installing a Photovoltaic system on another roof or plot.

Preparation of your quotation based on your energy needs

E.A.C. approval (sign the installation agreement with E.A.C.)

Installation of the PV System
