

Office energy storage tunis city

Clarke Energy has relocated to a new office in Tunisia with the the official inauguration of the offices taking place on December 16, 2021. As a major player in the field of sustainable energy and the environment, and in the context of its strong development in Tunisia and its continued growth in Africa, the Clarke Energy Group continues to believe in the investment climate in Tunisia and decides to strengthen its Tunisian teams and expand its Regional Hub for Francophone Africa based in Tunis by investing in a new headquarters located in the gardens of Lake 2, Tunis.

The signing of a partnership contract with the Rose Blanche Group was completed in the presence of the representative of the British Embassy Mr. Matthew Forman, Deputy Chargé de Mission and many valued customers invited by Clarke Energy

This new site is equipped with a spare parts warehouse of the gas engine manufacturer INNIO Jenbacher.

This is an important decision that comes in a delicate health context, but it is a strong signal from a British company that continues to believe in Tunisia's strategic position and the quality of its skills.

Clarke Energy took the opportunity to celebrate the signing of a global partnership agreement with Rose Blanche Group to ensure the optimal energy efficiency of the group's plants for a total capacity of 11MWe.

If you have any technical questions that need answering, would like to arrange to speak to a sales advisor or book a feasibility study.
