Find parts & accessories for your Panasonic product

The climate crisis is the most urgent issue of our time. Addressing it is our responsibility.

With our LUMIX cameras, we're dedicated to achieving the highest possible image quality, resulting in compositions that faithfully reflect the photographer's intent and stir our deepest emotions. To enable every photographer and videographer to realize their vision, we're creating cameras that break new ground in ergonomics, focus and other important areas. Our G Series, popular with enthusiasts, semi-professionals and professionals whose primary medium is video, provides low-light and 6K/4K video capabilities for the wide-aspect Hollywood look.

Offering fast, accurate phase hybrid autofocus, the LUMIX S5II is designed for photo and video excellence. The 24.2-megapixel 35mm full-frame CMOS sensor complies with PDAF (Phase Detection Auto-Focus) with Active I.S. to support walking shots, and an imaging engine with high resolution, natural description, and approximately 2x higher-speed signal processing for high bit-rate video recording.
