By advancing its own energy transition, China is actively contributing to the ...

BEIJING, Aug. 29 -- China's State Council Information Office on Thursday released a white paper titled "China's Energy Transition."

Please see the attachment for the document.

Full text: China's Energy Transition

I. China's Path of Energy Transition in the New Era

II. Promoting Green Energy Consumption

IV. Developing New Quality Productive Forces in the Energy Sector

V. Modernizing Energy Governance

VI. Contributing to a Global Community of Shared Future

BEIJING -- China's resolute, sustained efforts in energy transition have made irreplaceable contributions to improving the well-being of humanity.

A white paper titled "China's Energy Transition" released recently showcased historic achievements in its energy transition over the past decade and shared its practices with the world.

In 2023, clean energy consumption accounted for 26.4 percent of China's total energy use, up 10.9 percentage points from 2013.
