

Permanent magnet generator 220v 100rpm

Permanent magnet generator 220v 100rpm

Increase your renewable energy production with the FLTXNY 100rpm 300Rpm 48V 96V 220V DC Generator. Its permanent magnet alternator and coreless maglev design provide efficient and reliable power generation for your DIY wind turbine project. Perfect for environmentally-conscious individuals looking to reduce their carbon footprint.

Maglev Generator 12V 24V 48V 3 Phase Gearless Magnet AC Alternators Use For Wind Water Turbine Diesel Engine 1000W

The FLTXNY DC Generator Permanent Magnet Alternator utilizes coreless maglev technology to provide efficient and reliable power for your DIY wind turbine. With options for 10KW or 20KW output and varying RPMs, this generator can support multiple voltage inputs (48V, 96V, 220V, 380V). Expertly designed, it guarantees the highest level of performance.

Our medium-speed PMGs operate with a single- or two-stage gearbox. Combining the advantages of low- and high-speed technology, these PMGs offer extremely high availability and reliability, resulting in increased annual energy production.

All generator active parts are assembled directly around the secondary gear stage, so the generator and gearbox can utilize the same bearings, and the gearbox lubrication oil can be used to cool the generator. This solution is compact in size and offers the lowest weight in the market.

The most compact medium-speed solution available on the market today, FusionDrive(R), utilizes the same frame for both the generator and gearbox. FusionDrive(R) is the result of bringing together the world-class wind power technology of Moventas, one of the industry's leading wind gear manufacturers, and The Switch.
