Statista R identifies and awards industry leaders, top providers, and exceptional brands through exclusive rankings and top lists in collaboration with renowned media brands worldwide. For more details, visit our website.

Key regions: China, Norway, United Kingdom, Netherlands, France

Featuring the technology to seamlessly switch between an electric motor and a petrol engine, Jaguar PHEVs deliver the best of both worlds.

PHEVs can be charged using a professionally installed home charger, a domestic socket, and at many public charging locations such as gyms, shopping centres and motorway services.

Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles, parts and accessories and alterations take place continually, and we reserve the right to change without notice.

*Official Fuel Consumption Figures for the F-PACE PHEV in l/100km: Combined 1.7++. CO2 Emissions from 39 g/km++. EV Range: Up to 65km.

Official Fuel Consumption Figures for E-PACE PHEV in l/100km: Combined 1,4 - 1,6. CO2 Emissions 31 g/km. EV Range: Up to 62km. The figures provided are as a result of official manufacturer's tests in accordance with EU legislation with a fully charged battery. For comparison purposes only. Real world figures may differ. CO2, fuel economy, energy consumption and range figures may vary according to factors such as driving styles, environmental conditions, load, wheel fitment, accessories fitted, actual route and battery condition. Range figures are based upon production vehicle over a standardised route.

+The figures provided are NEDC2 calculated from official manufacturer's WLTP tests in accordance with EU legislation. For comparison purposes only. Real world figures may differ. CO₂ and fuel economy figures may vary according to wheel fitment and optional extras fitted. NEDC2 are figures calculated using a Government formula from WLTP figures equivalent to what they would have been under the old NEDC test. The correct tax treatment can then be applied.

[View F-PACE WLTP figures](#)[View E-PACE WLTP figures](#)

WLTP is the new official EU test used to calculate standardised fuel consumption and CO₂ figures for passenger cars. It measures fuel, energy consumption, range and emissions. This is designed to provide figures closer to real-world driving behaviour. It tests vehicles with optional equipment and with a more demanding

test procedure and driving profile.

++View I-PACE WLTP figuresWLTP is the new official EU test used to calculate standardised fuel consumption and CO₂ figures for passenger cars. It measures fuel, energy consumption, range and emissions. This is designed to provide figures closer to real-world driving behaviour. It tests vehicles with optional equipment and with a more demanding test procedure and driving profile.

1 Charges times will vary dependent on several factors, including but not limited to: the state and time of the charge of the battery; battery temperature; and actual use
