

Port moresby solar energy for the environment

Port moresby solar energy for the environment

The Sustainable Development team started in November 2019, and now has young, vibrant members who are mentored by Australian Volunteers. The team is looking to expand even more over 2023, to improve the way Solar Solutions thinks about and approaches Sustainable Development.

Our aim is to improve the lives of people living in the remote areas of Papua New Guinea through our range of products and services. As a subset of a living company, we focus on achieving sales through projects but also ensure good development practices and social inclusion through our distribution approach.

Partnerships and Projects:

We create new partnerships, maintain current partnerships, and look for opportunities to collaborate on projects. Our projects are within the solar space, and ranges from urban lighting solutions to rural electrification projects. We work in partnerships with Donors, NGOs, CBOs, Government Organization, Corporate Companies, and Individuals.

Knowledge and Innovation:

We collect information, ideas and use our experiences to tap into opportunities to bridge the energy access gap. Market research, and product testing and development is also part of what we do.

We use our knowledge, skills, and expertise to support governments and other partners to improve energy access planning.

Support ongoing core business activities to ensure sustainability of Solar Solutions, as needed.

Professional Development:

We continue to reflect on our work and achievement and find ways to further our professional and personal development.

Please fill out the form below, and we will get back to you promptly. Yourname, email address, and message are required fields.

We are driven by a vision of PNG where everyone has access to technologies that enable them to live productive, dignified and healthy lives.
