We are experts in solar energy. Our patent protected solar power units fits perfectly on top of 20" or 40" containers. No more hassle to get cost-efficient, green, energy to your containers.

Replace your noisy, fuel consuming generator with silent green solar power. For every kWh our system produces, you can run your CO2 emitting generators less. In many situations the traditional generators can be avoided all together.

Aid & Relief Organizations

Relief Organizations use containers for a range of purposes. Often it is for temporary housing in refugee camps, for storage or cooling.

Construction & Mining

At construction sites it is not always easy to get grid connected, and electricity is often provided by deploying noisy and fuel consuming generators. When fuel is plenty and cheap this can well be the easiest way to feed the power consumers.

In remote areas where fuel is difficult or expensive to access, or in situations where you appreciate the silence of solar power, we can recommend considering the SolarDrive Container Power Unit as a supplement for the noisy and polluting generators.

Preserving foods after harvest is crucial for the economy and environment. In some countries up to 80% of the food production is wasted due to improper storage. As consequence we are cultivating more farmland and destroying more nature than necessary. By offering green power for cooling facilities or reefer containers our solar power units can be a small pawn in nature preservation and fight against climate change while at the
