

Power generation from renewable energy sources

Power generation from renewable energy sources

Energy Information Administration - EIA - Official Energy Statistics from the U.S. ...

Renewable sources--wind, solar, hydro, biomass, and geothermal--accounted ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies.

You can find more about Ember's methodology in this document.

The Energy Institute Statistical Review of World Energy analyses data on world energy markets from the prior year.

All data and visualizations on Our World in Data rely on data sourced from one or several original data providers. Preparing this original data involves several processing steps. Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived indicators such as per capita measures, as well as adding or adapting metadata such as the name or the description given to an indicator.

At the link below you can find a detailed description of the structure of our data pipeline, including links to all the code used to prepare data across Our World in Data.

Our World in Data is free and accessible for everyone.

Help us do this work by making a donation.
