RIGA, July 29 (Xinhua) -- Power supply to around 30,000 houses in Latvia was disrupted on Monday morning due to storm damage caused by Cyclone Kirsti, which brought down trees and caused floods.

Since Sunday evening, Cyclone Kirsti has been raging in central Latvia, causing significant destruction in the capital Riga, and surrounding municipalities. Emergency services reported numerous fallen trees, street and basement floods, and traffic disruptions.

The strongest wind gusts, blowing at 27 meters per second, were recorded in Riga. Nearby municipalities, including the seaside resort of Jurmala, were also severely affected.

Kalneciems in Jelgava municipality experienced the heaviest rainfall, with 193 mm of rain in a matter of hours. The downpours and strong winds raised water levels in several rivers in central Latvia.
