

Power paul batteries cost

Power paul batteries cost

PPA batteries carry a 6 year fair use warranty, with up to 6000, 100% DOD the average user should see on average 10 years of usage when following good practice charge/discharge procedures. These batteries will accept charge rates of up to 150A, with a constant 125A. All the batteries will run a 3000VA inverter with ease.

PowerPaul® Batteries are handmade and assembled by a small team in Melbourne, with approximately 95% of components sourced from local Australian based suppliers. Every battery is calibrated, load tested and fully cycled at least twice to confirm and rate its capacity and quality.

Nifty 12.8v 160 Ah. Rated 5.00 out of 5. \$ 1,550.00 - \$ 1,625.00 inc GST. The Nifty slimline lithium battery fits into the places where regular batteries won't, giving you big power on demand without sacrificing your cabin space.

The cost is set at \$1800. However to help me cover the costs, I'm offering a \$100 reduction to the price if you pay \$850 by Thursday 28th Jan, and the remaining \$850 + freight cost on completion. That brings the price of the battery down to \$1700.
