

Remote energy management

Remote energy management

Energy & Technical Services has specialised in Smart Energy Management for over 25 years and committed to craft a sustainable world with less carbon along with our clients.

Our team of Building Engineers, Data Scientists, Control Specialists, and Energy & Carbon Managers offer end-to-end Energy Solutions.

If you are looking for making impact toward our environment and join a lovely and supportive team, checkt our latest vacancies out.

We are here to help! We welcome any enquiry and conversation about energy management and carbon savings. Contact us for a free intial consultation!

Energy Audit can be the game changer for your business. With a better understanding of your energy use, our clients then improve their energy strategy which leads to a saving up to 35% generally.

Understand your buildings better. To ensure efficient operations, we should plan, forecast, and establish conditions.

We offer maintenance contracts using top-quality products to keep your systems running efficiently. Our team ensures professional performance to maximize energy efficiency.

Planned preventative maintenance (PPM) enables you to effectively minimise reactive maintenance and ensure the longevity of your buildings and assets. It not only enhances the energy efficiency but also empowers your building assets.

BeMS empowers building management to the next level with transparency and control, including cutting-edge analytics such as diagnostics and fault detection, optimisation, automated control, and customised reporting, open communication, and seamless intelligent integration.

IoT Smart Building is the future. In an era where connectivity, efficiency, and sustainability are paramount, our comprehensive system empowers you to transform your buildings into smart, responsive entities.

We offer a holistic approach to energy metering that encompasses electrical energy, heat/cooling energy, and gas consumption. Our solutions are designed to meet your specific needs while adhering to the Measuring Instruments Directive (MID).

With a focus on metering, control, analysis, and ongoing maintenance, we pave the way for a smarter, more

Remote energy management

efficient future. Explore how our services can help you achieve building management excellence.
