Using energy derived from natural sources that are replenished at a higher rate than they are consumed, there are a host of companies globally tapping into the resource that is renewable energy.

The most popular types of renewable energy — solar, wind, hydro, tidal, geothermal and biomass — provide a sustainable source of energy with less of an environmental impact than its fossil-based counterparts.

In celebration of those paving the way to a more sustainable future, we shine a light on the world's leaders in renewable energy.

Kicking off our list of the largest renewable energy companies, Canadian utility company Algonquin Power & Utilities provides rate-regulated utility and renewable energy services to more than one million consumers across North America. The services it provides include natural gas, water and electricity through Algonquin's operating business Liberty. The corporation also invests in clean and renewable energy sources, including the likes of solar, wind, hydro and thermal. The company boasts more than US\$16 million in assets globally.

Chinese polysilicon manufacturer Daqo New Energy supplies the solar PV industry and calls itself one of the world's low-cost producers. It was founded in 2007 and manufactures and sells high-purity polysilicon, used as a raw material by the solar photovoltaic and electronics industry. Photovoltaic product manufactures then further process the product into ingots, wafers, cells, and modules for solar power solutions. The company also offers ready-to-use polysilicon, packaged to meet crucible stacking, pulling and solidification needs.

Owning and operating renewable power assets, Brookfield Renewable has corporate headquarters in Ontario, Canada. It has a portfolio of renewable power-generating facilities worldwide. It is one of the world's largest investors in renewable power and climate transition assets, with one of its main business focuses being hydroelectric power operations. It also owns and operates wind, solar, distributed generation and storage facilities.

Brookfield leverages more than 120 years of operating experience and industry-leading innovation, driving value across its extensive clean energy platform and delivering innovative renewable power solutions that

accelerate the world towards a sustainable, low-carbon future.

Doing what it says on the tin, Canadian Solar Inc. is a solar energy company that designs and manufactures solar photovoltaic modules and provides energy solutions. Canadian-founded, the company serves customers in more than 160 countries worldwide.

As part of its operations, Canadian Solar is involved in supporting the installation of solar energy as well as a number utility-scale power projects. The company employs a workforce of more than 10,000 people worldwide.

Globally renowned and highly innovative solar technology company with a motto focused on embracing the mission of "changing the energy portfolio and taking responsibility for enabling a sustainable future", JinkoSolar is a Chinese solar power company that manufactures solar energy products like silicon ingots and wafers, solar cells and solar modules. As a company, JinkoSolar focuses on integrated research, development and manufacturing of photovoltaic products, as well as providing comprehensive clean energy solutions, leading in sales in the global mainstream photovoltaic market. Its customer base has a worldwide presence, with it serving 190 countries including the US, Europe, Asia, Africa and Latin America.
