## Renogy rego battery

Since 2010 we have been on a mission to change the way the world uses energy. We are committed to making a lasting impact on the earth by removing barriers to sustainable living and energy independence.

Our mission is to empower the energy independence of 50M people with DIY-friendly and reliable renewable energy products by 2030.

We are optimistic humankind can achieve a sustainable future where renewables are at the core of our energy supply.

Renogy started as a small project by students at Louisiana State University. With the help and support of the Louisiana Business and Technology Center, Renogy has grown into a flourishing company.

Renogy intends to be a driving force behind the push for sustainable living and energy independence.

Replacing four pieces of 12V 100A lithium batteries with one REGO 12V 400A lithium battery, not only provides you 5.12kWh massive storage capacity but will also save you more than 30% of the installation footprint.

The REGO 12V 400A lithium battery has integrated parallel cables, simplifies the wiring process, and allows you to use the easiest plug-and-play way to connect with the REGO battery hub box for system expansion. Up to 8 batteries can be connected in parallel, offering a total capacity of up to 40KWh.

\*Please kindly noted that the battery hub box needs to be purchased separately. One hub box can connect up to 3 batteries.

The REGO 12V 400A lithium battery manufactured with automotive-grade battery cells and with intelligent BMS ensures faster charging with more stable performance and longer life. The maximum continuous charging current can be up to 300A, which allows the battery to be fully charged in 1.5 hours. Assuring your electricity needs all the time.

The REGO 12V 400Ah lithium battery with IP65 rating waterproof design applies to more scenarios such as yacht, marine and outdoor, etc. The lids that use die casting technology have a much higher tolerance for extreme temperatures and better electrical properties and are more durable and stable compared to plastic parts, giving the battery full protection against dust and other particulates.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also
