

Residential solar morocco

Residential solar morocco

A clean energy pioneer positioning the UAE at the forefront of the worldwide energy transition.

Identifying value-enhancing initiatives for clean energy projects.

Advancing sustainability is at the core of Masdar.

Deploying renewable energy projects and realising low-carbon urban development

The Morocco Solar Home Systems (SHS) project is a Masdar-led initiative in partnership with Morocco's Office National de l'Electricité et de l'Eau Potable (ONEE). It provides 19,438 solar home systems in over 1,000 villages in the Kingdom of Morocco.

The solar home systems, along with broader electrification initiatives, will provide 99 per cent of rural Morocco with access to energy, enhancing the lives of more than 116,000 people that did not previously have access to electricity. Each of the installed systems consists of two solar panels with a total capacity of 290 watts and two batteries with sufficient storage capacity for up to three days, thus ensuring uninterrupted power supply. In addition, the system includes eight LED light bulbs and light switches, three electric sockets and a 165-liter refrigerator.

99% of rural Morocco, extending electricity to 116,000 people

contact

Solarmen is an expert installer of green renewable energy systems that offers comprehensive engineering advice and tailor-made residential and commercial solar solutions to meet a wide range of needs. Whether your project is in the sector of agriculture, hospitality, industry or whether you are a private individual with domestic uses, Solarmen accompanies you and advises you in your solar projects and from desalination of seawater and brackish water thanks to high-performance solutions as close as possible to your installations.

The installation of photovoltaic panels in Morocco for the electricity supply of his villa, hotel complex or business is an advantageous solution on many points. It enables electricity to be produced in an environmentally friendly way and makes it possible to make significant savings. Solarmen will accompany you throughout this project so that you can switch to solar energy with confidence.
