Types of Solar Panel Roof Mounting Systems

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

You'll generally only see the shiny new panels when you install a rooftop solar panel system. But right under those panels is racking equipment, which is key to keeping them secure and in place.

The right racking equipment for your system primarily depends on your roof type. From there, you'll have a few brands to choose from--but usually, your installer will have preferred racking equipment that they'll select for you.

High-quality solar companies build systems meant to last. So, as long as you're confident in your installer, you should feel confident in the racking equipment they suggest. We'll explain some of the top brands you'll see in quotes from top installers, and how to make sure you're getting the right racking equipment installed.

The essential components of a solar racking system include flashings, mounts, rails, and clamps.

The top solar panel racking brands include SnapNrack, Unirac, IronRidge, Quick Mount PV, EcoFasten, and AllEarth Renewables.

Aesthetics, leak protection, wire management, and ease of installation all factor into racking system design.
