

Safe speed solar power bank

Safe speed solar power bank

Capacity: 35,800mAh Port output: 2 USB (3.1A) Direct charging: 6 hours Key features: 15W Solar panels, wireless charging

Four solar panels take advantage of your time outdoors. It operates off 15-watts, charging WAY FASTER than others. Some users said it only takes about 30 hours to charge their power bank using the panels fully. That's a far cry from 100 hours with a single panel battery.

This QiSa Solar 35800mAh Power Bank also comes with a good quality LED flashlight. Do some night exploring or flash an SOS sign to save someone's life. A multi-mode flashlight is a must for any trip into the great outdoors.

"With great power comes great responsibility." In this case, you're responsible for carrying this 1.5-pound battery. It's also three phones thick. Enjoy the power!

Capacity: 25,000mAh Port output: 2 USB Ports (2.1A) Direct charging: 12-15 hours Key features: 4 solar panels, foldable design, hooks to your backpack

This 25,000mAh solar power bank can go from 0-100% in about two days under direct sunlight. The 5-watt solar setup still charges faster compared to those with only one panel. And hey, if you're off the grid, any amount of power is better than none. Plus, with the LED light, you also get a light source.

The battery pack folds compactly. And looks sleek with the leather casing. It's also water-resistant and shockproof so that it can handle the rough wilderness.

Pro tip: This can handle water spills, but it's not cut out for swimming. Fold it up when you're scaling a mountainside. The panels on their own can only handle a little drop, not a tumble down a cliff.

Capacity: 20,000mAh Port output: 2 USB ports (1A/2.1A) Direct charge: NA Key features: 5 solar panels, wireless charging, 2 input/2 outputs

Let's start with the detachable solar panels. Each one has 260mAh capacity – that's a total of 1300mAh for the whole setup! You can fully charge your phone in 3 hours using the power of the sun. That's awesome if you're out on a weekend camping trip and run out of battery.

Now let's say it's Monday, and you start with the daily grind. You don't need all those panels every day. Conveniently, the four sheets are only attached magnetically. You can just pop it out and store it in your glove compartment. Ta-da! Normal power-bank.

Safe speed solar power bank

At 1.25 pounds, the BLAVOR Solar Power Bank is heavy. But remember, you're taking 20,000mAh of power with you. It's well worth it. Besides, you won't need cables with you. Hello, wireless charging.
