African Energy Commission is an African continental body in charge of ensuring, coordinating and harmonizing the: protection, conservation, development, rational exploitation, marketing and mainstreaming of energy resources on the African continent

The AFREC serves the 55 African Union Members states in terms of energy issues as guided by the Agenda 2063, SDGs and the Paris Agreement.

AFREC"s fundamental mission is to advance energy cooperation among all African Member States, including through:.

TOWARDS A HARMONISED AFRICAN ELECTRICITY MARKET

AFREC supports the collaboration between the EU and AU through the AUC Department of Infrastructure and Energy with the aim of working on building blocs for setting up a Harmonised African Electricity Market.

Get access to information on a wide range of energy issues such as energy statistics, energy efficiency and much more from our annual publications.

No one puts their children in a boat unless the water is safer than the land

The AFREC Africa Energy Statistics is a comprehensive collection of statistical data based on production, consumption, imports and exports of energy resources of the African countries.

The African Energy Commission (AFREC) is a specialized agency of the African Union in charge of developing, coordinating and harmonizing the energy policies with an objective of protection, conservation, development, rational exploitation, commercialization and integration of energy resources on the African continent.

Western Sahara lies in the Maghreb desert region, in the north-western part of the continent and bordered by Mauritania, Algeria and Morocco while on the western front it is bordered by the North Atlantic Ocean. The country has a population of 629 873 people living on 266 000 km2 of land however due to the vast expanse of

Sahrawi arab democratic republic residential energy storage

arid land, the population density is extremely low. There is a limited capacity for self-governance which has been a problematic issue over the years for Western Sahara.
