SDI, ?SDI?IT,,? SNE,2022, SDI 5% ?2022, SDI, 2023 ...

With super-gap technology and cutting-edge materials, Samsung SDI Europe delivers customer-specific solutions for the future of e-mobility, energy storage systems (ESS), IT, semiconductors and displays.

Our mission is to pursue relentless innovations to empower our customers to reinvent the battery-powered future, that is boundless and sustainable.

The Small-Sized Li-ion Battery division develops and sells battery products such as cylindrical-, prismatic-, and polymer-type batteries. This emerging market is accelerating through the growing demand in smart phones and tablets.

The demand for highly efficient and eco-friendly energy solutions is growing in innovative field such as electrical tools and E-Mobility. Accordingly We frequently extend our business range.

Samsung SDI concentrates on developing battery technology for low-carbon automobiles, working toward our vision in the field of the green and the clean energy solution.

By developing high-efficiency and high-capacity lithium-ion rechargeable battery and supplying it to the automakers worldwide, we try to minimize harmful emissions such as CO₂(carbon dioxide) from existing internal-combustion engine, thereby realizing sustainability through our products that are not only economic but also environment- friendly. We will go on making creative.

Samsung SDI joined the Li-ion ESS business in 2011. It is of the world's top technologies for small-sized lithium-ion rechargeable batteries. After just three years of running the business, we have been ranking on the top of the industry. Our solution delivers the world's most stable rechargeable batteries, as we were able to leverage from our vast experience in the small-sized battery business. ESS is a high quality solution, as it is utilizing the same highly reliable batteries that are used in BMW electric cars.

ESS is optimized for specific countries. This empowered us to leverage electronics in the home market of Japan and Europe, and in the commercial market in the US, faster than our competitors. As a result, in the third quarter of 2014, we became the number one provider in the global ESS market with a market share of 23.6%.
