MSc in Sustainable Energy | Arthurton Bellot | Geothermal Energy

From the 1970s, Iceland began its journey in sustainable energy education, launching the Geothermal Training Programme with UNESCO's support. This spirit of forward-thinking has only grown stronger with time.

Introducing the Iceland School of Energy (ISE). We're more than just an academic hub; we're a modern institution with a bold vision for the clean energy landscape. Whether you're pursuing graduate studies or advancing your professional skills, ISE is where innovation meets education. We're on a mission to empower the world's future in sustainable energy.

ISE stands out due to its balanced approach, blending industry expertise with academic insights. With joint ownership from industry leaders and Reykjavik University, we offer a unique environment where practical industry and business knowledge complements academic research. This combination ensures that ISE remains a leading institution in sustainable energy education. Furthermore, each of our partners holds a position on the board of directors for the Iceland School of Energy, ensuring a collaborative and holistic approach to our vision and operations.

Reykjavík Energy known in Icelandic as Orkuveita Reykjavíkur (OR), is a world-leading geothermal energy company. Over the past ten years, OR has pioneered the development of new geothermal power plants, leveraging its extensive experience in tapping geothermal resources for electricity and district heating.

With its subsidiaries -Veitur, ON Power, Reykjavik Fibre Network, and CarbFix, OR has grown to be Iceland's premier utility company, powering the capital region with electricity, water, and broadband.
