The U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) accelerates the advancement and deployment of solar technology in support of an equitable transition to a decarbonized economy. Learn more about the office's work at our events and webinars.

Learn how the Inflation Reduction Act could help you save on solar and review our federal solar tax credit resources.

Learn more about active SETO-funded projects at national laboratories, state and local governments, universities, nonprofit organizations, and private companies. See active projects in the map and database table--you can sort the projects by program area, funding opportunity, state, and more.

Every day, Americans are making the choice to power their lives with solar energy. SETO is connecting the dots for you, demonstrating how solar energy investments accrue over years to benefit individuals, communities, and the nation.

There is broad agreement that the world's current reliance on fossil fuels for energy is not sustainable.

This realization has led many countries to encourage the use of renewable sources of energy, such as solar.

In the United States, the Department of Energy's (DOE) Solar Energy Technologies Office (SETO) has been at the forefront of several projects that encourage the use of solar energy. The department used to publish a page to provide updates on their most important projects. However, this page is no longer available.

We took some time to find out what happened with three of the most important solar energy projects that the department managed.
