Seychelles vivint solar

Solar plans and packages for every budget. Get power independence with a Vivint ...

*Requires customer's execution of a Smart Home Agreement with Vivint for ...

A grid-connect solar photovoltaic PV system are installed at your premise and use the PUC electrical grid network to feedback electricity produced by your system.

For stand-alone, off-grid or battery back up system PV systems which are independent of the PUC network and use battery storage see our off-grid solar PV page.

A hybrid system uses both the grid and batteries.

Currently, Seychelles has a net metering policy where electricity produced by your solar photovoltaic PV systems is recorded to a separate meter. PUC then credits your electricity bill at the end of each month.

Sine 2012, ESS has been installing rooftop solar photovoltaic PV systems in the Seychelles. Therefore, we have experience with grid-tied roof top solar PV system. Also we are an approved installer by the Seychelles Energy Commission and Public Utility Corporation.

To know more benefits of renewable energy and save on your monthly electricity bill, call us today and we can assist you with the application process.

During the day the photovoltaic panel covert the suns energy to electricity. There are two types of PV panels depending on the manufacturing process, poly-crystalline or mono-crystalline. The panels are arranged on the roof in an array and connected to an inverter.

Energy Solutions Seychelles installs a range of PV panels from tired-one manufacturers and supply products to meet your project specifications and budget.

Additionally, the efficiency of the panels can be further enhanced by using optimisers. By installing the optimiser on each panel, the power output can be tracked of each individual module. Hence increasing the performance of the overall system.

Call us today to get more information of how you can offset your electricity bill with renewable energy.
