

Skopje solar thermal energy

Skopje solar thermal energy

PiKCELL Group, in partnership with Solar Power, has unveiled a plant to produce solar photovoltaic

This is the first such plant in Macedonia and the region, according to the reports.

The plant, spanning 1,500 square meters, currently employs 20 people, according to reports.

According to Goran Paunov, top man at PiKCELL Group, the plant can produce PV panels with a total capacity of 20 MW annually.

29 November 2024 - Power grid bottlenecks could jeopardize connecting new power plants to the system but also the operation of the ones already online

29 November 2024 - The National Assembly in Belgrade passed the Energy Sector Development Strategy of Serbia up to 2040 with Projections up to 2050

28 November 2024 - The European Union wants to maintain the rapid pace of decarbonization while enabling affordable energy prices

28 November 2024 - German firm Enercon forged an alliance with Turkey-based Enerji and Polat Enerji at the German-Turkish Energy Forum in Berlin

Project is being implemented by a civil society organization Center for Promotion of Sustainable Development
