If you're looking for a way to cut your energy bills, a small wind turbine can be a good option. But with so many brands and options, how do you know which one is right for you?

This article will highlight seven models that stand out from the competition.

The Bergey BWC Excel 10 is the best 10kW small wind turbine on the market today. With its stainless steel blades and corrosion-resistant frame, this turbine is built to last and will keep your energy bills low for years to come.

However, if you'd like something different, we've got a few alternatives. First, let's look at the variables to weigh when choosing a unit.

And to read about general pros and cons, and if small wind turbines are potentially worth it in the first place, check out this article.

Shopping for a small wind turbine can be overwhelming, especially if you're not familiar with all of the different factors to consider. Some of the most important ones include:

As you can see, there are many factors to consider when shopping for a 10kW small wind turbine for your home. But doing your research and using these tips can help you find the perfect fit for your situation.

However, we've done some of the research for you and compiled this list of the top seven small wind turbines available for homeowners or small businesses.

Let's take a look.

At only 1050 lb (476.27 kg), the Bergey Excel 10 is one of the lightest small wind turbines on the market.

Despite its small size, this turbine has a max power output of 10 kW and can generate up to 150-kilowatt hours per day.
