Solar battery storage qld

The Queensland Government's Battery Booster program is open for eligible ...

How a home solar battery system helps store electricity for a household.

Different types of home solar batteries, smart technology add-ons and understanding your unique system set up.

How a home solar battery system may benefit your household, and how to calculate the payback period.

How to look after your battery so it lasts as long as possible, and important safety information.

We pay our respects to the Aboriginal and Torres Strait Islander ancestors of this land, their spirits and their legacy. The foundations laid by these ancestors—our First Nations peoples—give strength, inspiration and courage to current and future generations towards creating a better Queensland.

The Battery Booster program closed to new conditional approval applications on 8 May 2024.

After receiving a conditional approval letter, householders will still have up to 90 days to install their conditionally approved battery system and claim the rebate.

The Battery Booster program rebate will help you better manage your electricity use and save on your energy bills.

Installing a home battery system might not make financial sense for all households. Learn more about battery systems to understand whether it's right for you and plan the right battery system for your home.

Eligible Queenslanders must receive a conditional approval letter from the Queensland Rural and Industry Development Authority (QRIDA) before purchasing and installing a new battery system under the Battery Booster rebate program.

The program is now closed for new applications for conditional approval.
