

Solar cell 370 kWh

Solar cell 370 kWh

VSUN370-120BMH is a PV module fit for both residential and commercial applications. VSUN engineers made the Sunergy series durable and efficient while minimizing the amount of useful space required for their operation. The Passivated Emitter Rear Contact (PERC) technology ensures excellent power output. This solar cell type employs an additional reflective layer to absorb more sunlight.

VSUN guarantees the highest power output. PERC technology and potent antireflective coating result in 20.04% module efficiency. This is significantly higher than average, which will result in substantial extra savings over the years of operation.

A low temperature coefficient provides more energy output at high working temperatures. VSUN loses just 0.28 percent efficiency for every 1.8°F over 77°F.

Multiple tests are part of the VSUN tight production requirements, which offer the highest level of quality assurance. Because of the facilities' high degree of automation, the business is able to uphold strict standards and minimize the number of warranty claims to an absolute minimum.

VSUN guarantees limited degradation over the ensuing 30 years. The performance will only degrade by a maximum of 2% the first year, and then only by a maximum of 0.45% yearly after that. After the 30 years are over, your modules will still show at least 84% of nominal capacity. A substantial 25-year product warranty is also included with this 370 W VSUN solar panel.

The panel has a sleek, all-black style that complements any roof beautifully. VSUN uses unique treatment and selection procedures to guarantee optimum cell color. The cells are connected by thinner wires, and from a distance, the surface of the modules seems seamless and smooth.

69.37" x 41.26" x 1.18"

The Grape Solar 370-Watt High Efficiency Monocrystalline PV Solar Panels use high efficiency solar cells made from quality silicon material for high module conversion efficiency, long-term output stability and reliability. Virtually maintenance free. High transmittance, low iron tempered glass for durability and enhanced impact resistance.

For bulk order only – Pallet Quantity: 31 pieces per pallet.

Panasonic Solar System Pricing

Solar cell 370 kWh

Panasonic EverVolt(TM) solar modules produce more power over the long haul fueled by industry-leading conversion efficiency and low degradation rate. Superior module efficiency of 20.6% (370W) and 21.2% (370W) and greater high-temperature performance deliver a high-output renewable energy source for residential solar systems.
